

Abstract Of The Disclosure

A seal for sealing the fuel injector from a valve mount opening of a cylinder head, the seal radially surrounding the region of the discharge-side end of a fuel injector, sealingly rests on the valve mount opening opening via a first section. By way of at least an axial partial
5 section, which extends only across a portion of the axial height of the seal, the seal is fitted in the region of the discharge-side end of the fuel injector in integral fashion, by form-fit and/or force-locking.
